1. OVERVIEW

ABOUT THE EPOP SURVEY

The Entrepreneurship in the Population Survey, or EPOP Survey, has been conducted in 2022 and 2023; three more annual collections are planned in 2024 to 2026. The survey is designed to understand the scope of entrepreneurial activities from adults 18 years and older in United States and result in a variety of measures of entrepreneurial behavior including current and former business ownership, whether individuals are currently taking or have in the past taken steps towards starting a business, the extent to which individuals engage in freelance work, and engagement with the “gig economy.” In addition to capturing the characteristic profile of the individuals involved in these various entrepreneurial activities across the U.S., the survey collects information on the behaviors, challenges, and resources available to individuals during the entrepreneurial process.

Information about the EPOP Survey methods, data availability, publications, and access to data user support may be found on the project’s website: EPOP.norc.org.

EPOP SURVEY MANAGER AND CONSERVATOR

NORC at the University of Chicago (NORC) is developing and conducting the EPOP Survey Project with grant funding from the Ewing Marion Kauffman Foundation. NORC is responsible for collecting, maintaining, disseminating, and safeguarding the resulting EPOP Survey data. For the project, NORC is both the manager of the enterprise and conservator of the resulting data.

NORC is an independent research institution that delivers reliable data and rigorous analysis to guide critical programmatic, business, and policy decisions. We conduct objective, non-partisan research to help inform people in government, nonprofits, and businesses making decisions on key issues of the day. Our research addresses important issues like employment, education, and health care. Since 1941, NORC has conducted groundbreaking studies, created and applied innovative methods and tools, and advanced principles of scientific integrity and collaboration. Today, government, corporate, and nonprofit clients around the world partner with NORC to transform increasingly complex information into useful knowledge. For more information, visit norc.org and connect with us via Twitter (twitter.com/norcnews) or Facebook (facebook.com/NORCatUofC.)

SPONSOR AND PARTNER

The Ewing Marion Kauffman Foundation is a private, nonpartisan foundation based in Kansas City, MO., that seeks to build inclusive prosperity through a prepared workforce and entrepreneur-focused economic development. The Foundation uses its \$3 billion in assets to

change conditions, address root causes, and break down systemic barriers so that all people – regardless of race, gender, or geography – have the opportunity to achieve economic stability, mobility, and prosperity.

For more information, visit their website at Kauffman.org or connect with Kauffman via Twitter (twitter.com/kauffmanfdn) or Facebook (facebook.com/kauffmanfdn).

ABOUT THIS DOCUMENT

This document is designed to help data users analyze and better understand the EPOP:2023 Public Use File data. If there is methodology that is not covered in this document, a full methodology report for the 2023 survey may be found on EPOP.norc.org.

2. EPOP SURVEY DESIGN AND RESPONSE RATES

TARGET POPULATION

The target population of the EPOP Survey includes noninstitutionalized adults 18 years or older in the United States.

The sample design supports the following estimation objectives:

- National estimates of entrepreneurial activity by demographics such as race/ethnicity, gender, age, and education, but not necessarily by the cross of these demographic variables,
- State-level estimates of entrepreneurial activity by race/ethnicity and gender, but not necessarily by the cross of these variables, and
- Metropolitan statistical area (MSA) level estimates of entrepreneurial activity for the top 50 MSAs by population¹ by race/ethnicity and gender, but not necessarily by the cross of these variables.

SAMPLE DESIGN

A stratified sampling design is used to achieve these objectives. Each state that does not contain a top 50 MSA constitutes a primary sampling stratum or a geography. For states that contain one or more of the top 50 MSAs, each MSA and the rest of state outside MSAs make a primary sampling stratum. For example, seven (7) strata or geographies are defined for the state of California, including the six (6) MSAs within the state plus the rest of the state. In addition, MSAs that are made up of counties from multiple states are divided into multiple primary sampling strata, one for each state. For example, Minneapolis-St. Paul-Bloomington, MN-WI, contains counties from both Minnesota and Wisconsin. One important objective of the study is to support estimation and analysis of entrepreneurship characteristics of underrepresented minorities, particularly Black and Hispanic individuals, within states and MSAs. Therefore, each primary stratum is further divided into three secondary sampling strata: Hispanic, non-Hispanic Black, and non-Hispanic Other.

SAMPLE SOURCES

The study sample is selected from three frame sources:

1. NORC's AmeriSpeak® Panel,

¹ Top 50 MSAs are defined according to total population size in the 2020 decennial census. In the remainder of this document, "MSAs" refer to these top 50 MSAs.

2. An address-based sample (ABS) frame built from the United States Postal Service (USPS) Delivery Sequence File (DSF), and
3. Opt-in online survey panels.

Samples selected from the AmeriSpeak Panel and the ABS frame are probability samples with explicit stratification and known sample selection probabilities while the sample obtained from the opt-in online survey panels is a nonprobability sample with unknown frame coverage and unknown selection probabilities. Subsequent to data collection, the completed surveys from the three (3) samples are combined through a tree model to generate a set of combined sample weights for estimation.

DATA COLLECTION AND RESPONSE RATES

EPOP:2023 survey data collection began on March 18, 2023, for the AmeriSpeak® sample, March 29, 2023 for the ABS sample, and June 14, 2023 for the opt-in online survey panel samples. Differential data collection protocols were followed for each of the sample types. After sending survey requests by USPS letter, email, and prompting calls, data collection ended on July 4, 2023 for both ABS and AmeriSpeak Panel samples. Data were primarily collected via an online survey; computer-assisted telephone interviewing was a secondary mode and available upon request. The survey was available in both English and Spanish. All participants were compensated for their participation.

The response rate varied by sample type. For the AmeriSpeak Panel sample, the response rate was 5.4%, and for the ABS sample, the response rate was 8.8%. For the opt-in survey panels, the response rate is not reported.

3. SURVEY CONTENT

SIGNIFICANT CHANGES FROM EPOP:2022 TO EPOP:2023

Based on data review of the EPOP:2022 data, updates were made to the EPOP:2023 questionnaire. Appendix B lists all survey item updates, including the specific change made, variable name, questionnaire section, and update type and category. The three main types of updates are:

1. New items,
2. Removed items, and
3. Changes to existing items.

Changes to existing items includes question wording updates, logic updates, and response option changes. In the 2023 questionnaire, the capital series variables (PE_CAPITAL and BO_ADDFINANCE) underwent the most refinement with both new items and changes to existing items. To facilitate easier data entry for respondents, the capital items were changed to a worksheet format that allowed respondents to enter dollar amounts for types of capital they received or requested and calculates the total in real time. Respondents could adjust entries based on whether the total amount matched their expectation.

Several minor changes were made to the screener for EPOP:2023. The primary goal of these changes was to enable more overlap across activity participation by reducing restrictions to activity assignment. First, current business owners were asked questions about previous business ownership and current freelancers were asked about previous freelancing; in the EPOP:2022 survey these follow-up questions were not asked. Second, all respondents were asked if they had withdrawn from an entrepreneurship endeavor; in EPOP:2022 only those who did not report some type of entrepreneurship activity were asked this question. Third, changes were made to identify “serial” entrepreneurs by asking how many businesses current business owners own and how many freelance jobs freelancer have. The first and second changes will affect national estimates of former business ownership, former freelancing, and withdrawn entrepreneurship although analysts could backcode the EPOP:2023 data could be comparable to EPOP:2022 estimates.

SCREENER

The screener section of the survey determines a respondent’s working status (e.g., currently employed, retired, student, etc.) and, if working, their working arrangements and any potential entrepreneurial activities they might be engaged in. Through a multiple step process, the screener section identifies various possible entrepreneurial activities capturing current and former business ownership, current and former freelance/consultant/independent contracting work, and

any current new business planning as well as situations where respondents were planning to start a business of some type at one point but withdrew from the planning process. Additionally, the screener was designed to capture flexible work arrangements provided by the gig economy.

Employment Status Measurement

The EPOP Survey first establishes the respondent's work status by asking, *"In the last week, did you work for pay at a job or business?"* Following the results of Abraham and Amaya (2019), the questionnaire also asks, *"In the last week, did you do ANY work for pay, even for as little as one hour?"* By asking this follow-up question of respondents who report they are not working, the survey ensures more informal work activities are captured and asked about which is important for determining an accurate measurement of gig work and the full suite of entrepreneurial activities.

Job Type and Gig Work Measurement

After establishing employment status, the EPOP survey collects key job information from those employed to construct a typology for entrepreneurs. This includes three main job types: (1) self-employed/business owner (respondents who select they either own their own business or are freelancers), (2) working for a for-profit or non-for-profit company, or (3) working for the government. This information is collected for both primary and secondary jobs.

Additionally, respondents are asked if the primary or secondary job is gig work. Given the potential for lack of clarity in what counts as gig work, the survey includes extensive examples of gig work activities and includes a definition of gig work in the main text of the question:

"Some people earn money through short, paid tasks or jobs online or in-person that are conducted through companies that coordinate payment for the service. This is sometimes referred to as 'gig work.'"

A final question is asked to determine if respondents are engaged in gig work regardless of the prior responses about the primary and secondary jobs to ensure all gig work activities are reported even if that gig work is not the primary or secondary job.

Entrepreneurial Activities

Once job information has been captured, the EPOP Survey asks questions to gauge entrepreneurial activities directly. These survey items include a series of questions designed to determine if a respondent currently owns a business but does not work at it; has owned any sort of business enterprise in the past which is now closed; is planning a new business enterprise; or considered starting a business in the past, but ultimately withdrew from the enterprise. In EPOP:2023, the survey broadened the set of respondents asked former ownership and freelancer questions and nascent business owner questions to make each entrepreneurial activity fully

independent of one another. More information on these screener changes are detailed above in Subsection 3, “Significant Changes from EPOP:2022 to EPOP:2023”.

1. **Former business ownership and freelancer.** Respondents are asked if they have ever owned a business or freelancer and if so when this activity stopped. Importantly, some respondents at this step report they currently own a business even though it is not reported as a current job. This likely reflects individuals who are currently passive business owners, and the business ownership is not considered a job. The results presented below combine these business owners with those who report business ownership as their primary or secondary job.
2. **Nascent entrepreneur.** To measure whether respondents are currently taking steps towards owning a business venture of any type, respondents are asked, “*Are you, alone or with others, currently trying to start a new business, including any form of self-employment, freelancing, consulting, or independent contracting, or selling any goods or services to others?*”
3. **Withdrawn entrepreneur.** Respondents are asked if they have ever considered starting a business, but withdrew from planning the enterprise: “*Have you, alone or with others, ever considered starting a new business, including any form of self-employment, freelancing, consulting, or independent contracting, or selling any goods or services to others but decided to wait or change your mind?*”

PATHWAYS AND PRIORITIZATION

The EPOP Survey screener is intentionally designed to capture the full range of entrepreneurial activities in which an individual might be engaged. As a result, some respondents qualify for multiple categories. To limit the burden on survey participants, each respondent is assigned to just one entrepreneurship category for follow-up survey questions using a priority order schema. That priority schema and description of each entrepreneurship category are presented here and shown in Table 1.

1 Current Business Owners

Respondents who report they currently own a business. Importantly, some respondents report that they currently own a business even though it was not reported as a current job. This likely reflects individuals who are currently passive business owners, but for whom the business ownership is not considered a job. The results presented below combine these business owners with those who report business ownership as one of their two primary jobs. Therefore, “current business owners” includes individuals who report that they still own a business even if it is not one of their two primary jobs.

2 Current Freelancers

Respondents who report they are currently freelancers, consultants, or independent contractors. Like the current business owner category, this category includes individuals who report that they are freelancers, consultants, or contractors even if they do not report their freelance work as one of their two primary jobs.

3 Nascent Entrepreneur

To measure whether respondents are currently taking steps towards owning a business, respondents are asked “*Are you, alone or with others, currently trying to start a new business, including any form of self-employment, freelancing, consulting, or independent contracting, or selling any goods or services to others?*” For the purposes of survey categorization, this classification does not condition on specific steps being taken towards entrepreneurship (such as Bennet and Chatterji (2019)), but this information is available in the EPOP Survey’s follow questions. In this way, individual researchers can create measures suited to different definitions of nascent business development.

4 Former Business Owners

Respondents who answer they used to own a business but are no longer current business owners.

5 Former Freelancer

Respondents who report they were at one time a freelancer, consultant, or independent contractor but are no longer engaged in freelance work.

6 Withdrawn Entrepreneur

Respondents who answer yes to the following question regarding whether they have considered starting a business, “*Have you, alone or with others, ever considered starting a new business, including any form of self-employment, freelancing, consulting, or independent contracting, or selling any goods or services to others but decided to wait or change your mind?*”

7 Non-Entrepreneur

Respondents who are not engaged in any of the previous six entrepreneurial activities. These respondents receive “general population” questions.

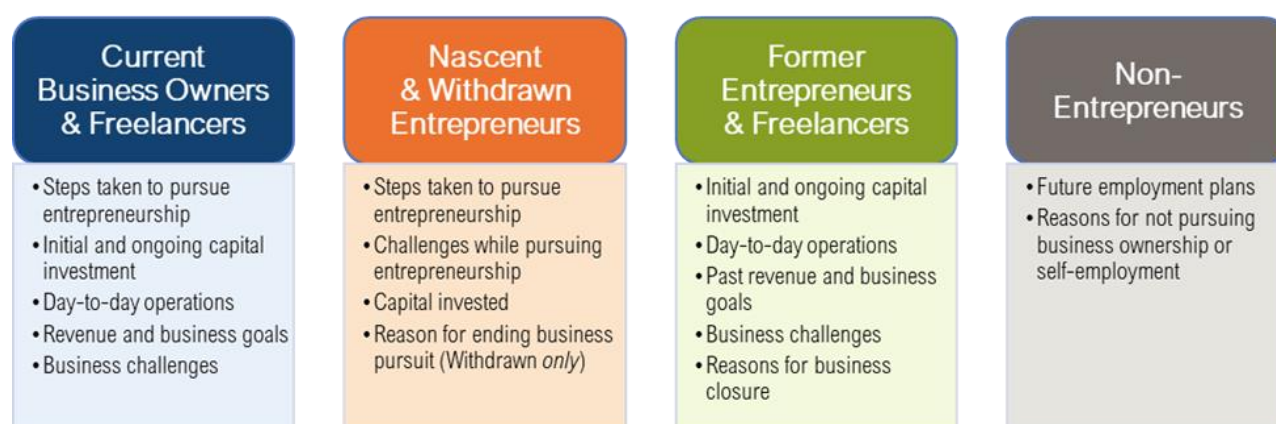

Table 1. Assigned Entrepreneurship Categories by Reported Entrepreneurship Activities

Survey Pathway Priority	Assigned Entrepreneurship Category	Total Surveys	Reported Entrepreneurship Activity					
			Current Business Ownership	Current Freelancing	Entrepreneurship Planning	Former Business Ownership	Former Freelancing	Withdrawn Entrepreneurship Planning
1	Current Business Owner	5,949	5,949	3,734	3,416	1,626	1,675	3,720
2	Current Freelancer	4,409	0	4,409	1,602	943	1,089	2,165
3	Nascent Entrepreneur	1,883	0	0	1,883	357	604	1,389
4	Former Business Owner	2,308	0	0	0	2,308	1,191	698
5	Former Freelancer	2,294	0	0	0	0	2,294	736
6	Withdrawn Entrepreneur	2,734	0	0	0	0	0	2,734
7	Non-Entrepreneur	11,055	0	0	0	0	0	0
Total		30,632	5,949	8,143	6,901	5,234	6,853	11,442

ANCILLARY QUESTIONS BY ENTREPRENEURSHIP CATEGORIES

The focus of the EPOP Survey ancillary or follow-up questions asked of each assigned entrepreneurship category is shown in Figure 1 and are briefly described below. Survey questions for current and former business owners and freelancers focus on concepts such as the operations and goals of the activities, whereas nascent and withdrawn entrepreneurs are asked more about concepts such as challenges starting a business. Non-entrepreneurs are asked more general questions about future employment plans as well as reasons for not pursuing business ownership or self-employment.

Figure 1. EPOP Survey Content Focus by Assigned Entrepreneurship Categories

Pursuing Entrepreneurship Section

The questions in this section focus on the steps respondents took to pursue starting a business or working for themselves. The topics covered within this section are asked of current business owners and Freelancers as well as nascent and withdrawn entrepreneurs.

Business Ownership Operations Section

The questions in this section focus on the day-to-day operations of business owners and freelancers/consultants/independent contractors when their businesses were in full operation. For former business owners and freelancers, the questions pertained to the last year when their business was in operation. Specifically, the topics covered in this section include questions on when they started the business or self-employment and general descriptions of the type of business, legal status of the business, and how they came up with the idea for the business or self-employment.

For current and former business owners and freelancers, this section also asked for the types and amounts of additional financing they requested and/or received to continue the business or self-employment, the number and types of employees they used in their business, how much time they spent managing or working in their business, their revenue and profit/loss margin, their goals for the next five years, their biggest challenges facing their business (or former business), and their post-entrepreneurship plans and exit strategy.

Finally, all entrepreneurship categories were asked to indicate the industry that best classifies their current, former, or idea for a business.

Non-Entrepreneur Section

The questions in this section focus on respondents who did not have any prior experience with business ownership and were not currently taking steps to own a business or be self-employed. These respondents are asked to provide reasons why they have not considered entrepreneurship and to describe their current work arrangements including how long they've been in their current job, how many coworkers they have, how much they've worked in the past year, what type of benefits they receive with their work, and their likelihood of starting a new job or changing jobs in the future.

See Appendix A from a detailed graphic showing the question topics asked across all the assigned entrepreneurship groups.

DEMOGRAPHICS

The EPOP Survey asks a comprehensive set of demographic questions. The demographic questions asked at the start of the survey are critical for weighting and are considered primary. The remaining demographic survey items are asked last and considered secondary.

Primary

The primary demographic variables that were asked of the ABS and nonprobability samples included age, gender, ethnicity, race, household income, education, and number of adults in the household. For the AmeriSpeak sample, panel member data on age, gender, education, ethnicity,

and race were already known and were not asked again as part of the EPOP Survey questionnaire.

Secondary

Secondary demographic variables included student status, health insurance and benefits, debt amount, marital status, number of household members, number of children in the household, military status, and citizenship status. These secondary demographic questions were asked of all respondents from all sample types.

Difference in Demographic Survey Administration by Sample Type

Data users should be aware that demographic variables were collected somewhat differently for the different sample types. The AmeriSpeak Panel members collected all primary variables and most secondary variables when the individual was originally recruited for the panel and the EPOP Survey did not re-ask those questions of those sample members. The ABS and opt-in online survey sample respondents were asked all demographic questions during EPOP survey administration. To mitigate inconsistency and potential bias across samples, the EPOP Survey aligned the demographic survey items to the AmeriSpeak Panel's version.

4. WORKING WITH EPOP DATA FILES

EPOP Survey data is available via both a restricted use data file (RUF) and a public use data file (PUF) for each annual survey. Both data file types include variables for all survey questions in a format suitable for analysis without disclosure risk. Many variables in the RUF and PUF represent all response choices in the original survey questions. However, based on the need to protect respondent identity, question responses have been aggregated as necessary. In some cases, as with open-ended questions, variables were omitted entirely as the answers are unique to the respondent. The [EPOP:2023 Questionnaire](#) shows how the survey item was asked and the data file codebooks (described below) will show if any response options were aggregated for the restricted and public use analysis files. Together, these documents allow data users to clearly see where and how survey item aggregation was implemented.

The RUF provides more finely grained response options aligned more closely to the original response choices in the survey. To obtain the RUF, data file data users must undergo training on disclosure and publishing considerations and sign an agreement. (Please see the “Data Protection” section of this document for more information on the disclosure review process and disclosure considerations). The PUF presents some survey data items in broader categories. The PUF is available on the project website and is available to all interested data users without the need for a formal data use agreement.

ADMINISTRATIVE VARIABLES

Both the RUF and PUF contain a set of administrative variables. Administrative variables include information relevant to how the survey was administered, how data was edited, or sample information. Table 2 shows the administrative variables included in the files. Note that only the RUF contains the EPOP Survey sample type variable (SAMP_TYPE). More information on these variables is provided in the data codebooks.

Table 2. EPOP Survey Data File Administrative Variables

Variable Name	Variable Label	RUF or PUF
R_SUID	RESPONDENT ID	Both
SAMP_TYPE	EPOP SAMPLE TYPE	Both
PARTIAL_CASE	INDICTOR FOR PARTIAL COMPLETE CASES	Both
Q_LANGUAGE	SURVEY LANGUAGE	Both
Q_MODE	SURVEY MODE	Both
DEM_AGE_IMPUTED	INDICATOR FOR IMPUTED AGE VALUES	Both

LOCATION VARIABLES

Both the RUF and the PUF include the respondents' residence location data. Each file includes a nine-category Census division variable and four-category Census region derived from the respondent's county or ZIP code. The RUF also includes a county and state variable. Some respondents provided their ZIP code if they could not identify their county. ZIP code was then linked to county. Note that many ZIP code cross multiple counties. For these cases where county was identified from ZIP codes, the case was coded to the county with the highest population based on 2021 Census estimates. The derived variable ZIP_TO_M_COUNTY is set to '1' for these cases. Table 3 shows the location variables.

Table 3. EPOP Survey Location Variables

Variable Name	Variable Label	RUF or PUF
CENSUS_DIV_DRV	CENSUS DIVISION DERIVED FROM ZIP CODE	Both
REGION_DRV	CENSUS REGION DERIVED FROM ZIP CODE	Both
COUNTY_DRV	COUNTY FIPS CODE DERIVED FROM ZIP CODE	Only RUF
DEM_STATE	RESPONDENT STATE	Only RUF

WEIGHTING VARIABLES

In addition to the survey weight (WTSURVY), design variables (PSU, STRATA) are included to allow for calculating accurate standard errors (more information on the weighting process is in the "Weights" section of this document). The RUF also includes a weight constructed for only the probability sample (WTPROB). Table 4 shows the available survey weight variables.

Table 4. EPOP Survey Weight Variables

Variable Name	Variable Label	Included in:
WTSURVY	SURVEY WEIGHT: APPLIES TO ALL CASES	Both
WTPROB	PROBABILITY SAMPLE WEIGHT: FOR WORK WITH ONLY ABS AND AMERISPEAK SAMPLES	Only RUF
STRATA	SAMPLING STRATA	Both
PSU	PRIMARY SAMPLING UNIT (PSU)	Both

DATA FILE CONVENTIONS

Variables Name

In most instances, variable names within the RUF and PUF match each other and the variable names in the EPOP Survey Questionnaire. In instances when survey responses were aggregated to protect respondent confidentiality, variable names have been modified. For example, the original variable name in the questionnaire for the highest level of education is “DEM_EDU.” Both the RUF and PUF require a different level of aggregation based on disclosure considerations. The variable recoded for the RUF is appended with “_RUF.” The variable recoded for the PUF is appended with “_PUF.” When a variable is recoded using the same level of aggregation for both the RUF and the PUF, the variable name is appended with “_DRV.” For instance, the nine-category census division the same grouping for both the PUF and the RUF. This variable is named “CENSUS_DIV_DRV” in both files. Table 5 shows the variable name convention used to indicate which variables are modified for the RUF or PUF.

In the 2023 data collection round, additional naming conventions were development to track differences between EPOP survey rounds. Efforts were made to use the same variable across rounds but in a small number of circumstances this was not possible. In some instances, improvements to the survey content or flow required the use of new variable names and at times different aggregations were necessary to preserve respondent confidentiality during the disclosure review process. When this occurred, we added a ‘Y2’ to the variable to indicate that the content or the code-frame of this variable changed from the Year 1 round. Tables 5 and 6 provide examples of how the ‘Y2’ naming convention is used.

Table 5. EPOP Survey Data Variable Name Conventions indicating Aggregation

Variable Source	Name Convention	Example
Original Questionnaire Variable	No change	DEM_EDU
Aggregated for RUF	_RUF	DEM_EDU_RUF
Aggregated for PUF	_PUF	DEM_EDU_PUF
RUF Aggregations updated in Year 2	_Y2_RUF	BO_REVENUE_1_Y2_RUF
PUF Aggregations updated in Year 2	_Y2_PUF	BO_REVENUE_1_Y2_PUF
Aggregated for RUF and PUF	_DRV	CENSUS_DIV_DRV

Table 6. EPOP Survey Data Variable Name Conventions indicating Across-Round Changes in Questionnaire Content

Variable Source	Name Convention	Example
EPOP Year 1 variable	No change	S_FORMFREE_STAT_1
EPOP Year 2 variable	_Y2	S_FORMFREE_STAT_1_Y2

When merging files from multiple rounds together, these naming conventions will prevent data users from accidentally combining variables that have a different meaning. In some instances, variables that have answer choices specific to Year 2 can be recoded and combined with Year 1 variables. Tables in Appendix C show which variables can be combined is provided with the EPOP:2023 RUF and PUF downloads. Data users should reference these tables for guidance on how to combine these variables.

Reserve Codes

When respondents skipped or refused questions or indicated they did not know the response to a question, the response is coded with a reserve code value. Similarly, data points that present a disclosure risk either in isolation or in combination with other data points are masked with a reserve code value. Table 7 shows the list of reserve codes used in the EPOP Survey data files.

Table 7. EPOP Survey Reserve Code Values

Reserve Code	Label
-3	Missing
-5	Don't Know
-7	Suppressed

DATA PROTECTION

To protect the EPOP Survey data from allowing the potential re-identification of respondents, these four Statistical Disclosure Limitation (SDL) techniques have been used:

1. **Recoding.** Recoding can be used for both categorical and continuous variables. For categorical variables, it involves combining smaller categories into larger categories. It can also be used for continuous variables to code numbers into categories.
2. **Local Suppression.** Local suppression creates missing values to replace some the values.
3. **Rounding.** Rounding is applied to continuous variables like numbers to make the data harder to re-identify
4. **Mirco-aggregation.** Micro-aggregation clusters records into small groups and then the average is released as the value for some of the sensitive units

The variables that have undergone recoding, rounding, or micro-aggregation are indicated in the data files with variable names with the suffixes _PUF, _RUF, or _DRV (see Table 5). Variables that have undergone local suppression are in Table 8. All suppressed values in the PUF and RUF are indicated by -7 (see Table 7). For a full description of the various recoding schemas used in the PUF and RUF and the SDL methods used in the EPOP Survey data files, see the methodology report on [EPOP.norc.org](https://www.epop.norc.umd.edu/).

Table 8. EPOP Survey Restricted and Public Data File Suppression Count by Variable

WEIGHTS

Development of Weights

The EPOP Survey contains two sets of weights: probability sample weights for probability samples (AmeriSpeak and ABS samples), and combined sample weights for the combined probability and nonprobability samples. The combined sample weights are available in both the RUF and PUF, whereas the probability sample weights are available only in the RUF.

Creation of the probability sample weights follows these steps:

1. **AmeriSpeak sample base weights.** Computed as the AmeriSpeak Panel weights divided by the probabilities of selection from the AmeriSpeak Panel to the study sample.
2. **ABS sample base weights.** Computed as the inverse of the selection probabilities that account for both the first and second phase of the ABS sample selection.
3. **Adjustment for unknown eligibility.** This adjustment is applied to the ABS sample because the eligibility status of some sample addresses is not determined at the end of the survey. Through this adjustment, the weights assigned to cases with known eligibility are inflated to account for the eligible cases among the cases with unknown eligibility. This adjustment is not applied to the AmeriSpeak sample because all AmeriSpeak samples are assumed to be eligible.
4. **Adjustment for interview nonresponse.** The weighting class method is used to adjust the weights for interview nonresponse. For the AmeriSpeak sample, adjustment cells are constructed by cross-classifying:

- a. Geography (or primary sampling strata)
- b. Race/ethnicity (Hispanic and Non-Hispanic Black, and Non-Hispanic Other)
- c. Age (18-34, 35-64, 65 and older)
- d. Education (Some college or less and bachelor's degree or above); and
- e. Gender (Male and Female).

With more limited data for the ABS sample, adjustment cells are defined by cross-classifying:

- a. Geography (or primary sampling strata)
- b. Race/ethnicity (Hispanic and Non-Hispanic Black, and Non-Hispanic Other)
- c. Gender (Male and Female)

Through this adjustment, the weights assigned to complete cases are inflated to compensate for the eligible cases that did not complete the survey.

5. **Combined interview nonresponse adjusted weights for probability samples.**

The interview nonresponse adjusted weights computed for AmeriSpeak and ABS sample completes are then combined by geography where the composition factor is proportional to the number of completed interviews from each sample source. This combination is carried out such that the combined sample represents the target population for each geography.

6. **Raking to derive probability sample final weights.** Raking benchmarks are developed using the 2021 American Community Survey (ACS) 1-year estimates. Raking adjustments are conducted along these dimensions:

- a. Geography by Race and Ethnicity (Non-Hispanic White, Non-Hispanic Black, Hispanic, Non-Hispanic Other)
- b. Geography by Gender (Male, Female)
- c. Geography by Age (18-24, 25-29, 30-39, 40-49, 50-59, 60-64, 65+)
- d. Geography by Education (Less than High School, High School/GED, Some College, and BA and Above)
- e. Geography by Household income (< \$25,000, \$25,000-\$49,999, \$50,000-\$74,999, \$75,000-\$99,999, \$100,000+)
- f. Geography by Number of Adults in Household (1 adult in Household, 2 adults in Household, 3 or more adults in Household)

7. **Trimming.** Following these adjustments, extreme weights are trimmed within a given geography so that no weights are lower than 1 or greater than the median plus three times the interquartile range of the weights. This trimming reduces weight variability and increases the effective sample size.
8. **Re-raking.** The weights after trimming are re-raked to the population benchmarks by geography and race/ethnicity to ensure that:
 - a. Weight variations remain low per geography, and
 - b. The sum of weights by geography and race/ethnicity does not deviate from their respective population benchmark by more than 5% for each geography and 15% for each racial/ethnic-specific population benchmark (Non-Hispanic Black, Hispanic and Non-Hispanic All Other) within each geography.

Such deviations are allowed because raking does not necessarily converge due to the large number of raking dimensions. This trimming and raking process is repeated until the weight variation and alignment with benchmarks are considered satisfactory.

Weights for the combined probability and nonprobability samples are then developed through a regression tree model.

9. **Decision tree.** Implement the Classification and Regression Tree (CART) supervised machine learning algorithm to generate a decision tree. The decision tree splits the combined sample into a set of leaves.
10. **Estimate inclusion probabilities for the nonprobability sample.** The inclusion probability of the nonprobability sample is computed as the weighted empirical proportion of nonprobability sample cases in the leaf.
11. **Compute the combined sample weights.** The combined sample weights are computed from both known probability sample selection probabilities and estimated nonprobability sample inclusion probabilities. The combined sample weights are calibrated through a ratio adjustment such that the sum of the combined sample weights equal to the sum of the original probability weights within the leaf.
12. **Raking adjustment.** The combined weights are raked to population benchmarks by geography and by race/ethnicity within each geography.

How to Use Weights

The final EPOP:2023 analysis data contains 30,632 respondents, including 12,691 respondents from the probability sample and 17,941 respondents from the nonprobability sample. Two provided weights can be used to generate approximately unbiased estimates of the population, the combined weight (WTSURVY) and the probability sample weight (WTPROB). WTSURVY is used for generating estimates using the full sample which combines the probability and nonprobability samples. WTPROB is used for generating estimates based on only the probability sample.

Probability sample weights (WTPROB) are developed for AmeriSpeak and ABS samples to correct for potential bias due to unequal sample selection probabilities, nonresponse, and coverage errors. These weights can be used to produce unbiased national estimates, state and MSA level estimates, and estimates for other domains defined by the user. Any software package that can handle sample weights should produce correct weighted points estimates. The probability sample weights are available only in the restricted use file.

The combined sample weights (WTSURVY) are available in both the restricted use file and public use file and make analysis and reporting for many smaller domains possible due to its larger sample size. The combined sample weight can be used to produce approximately unbiased national estimates, state and MSA level estimates, and estimates for other domains defined by the user.

Variance Estimation

The EPOP Survey uses a complex sample design that needs to be accounted for in variance estimation. Otherwise, statistical software will likely underestimate standard errors of estimates. To facilitate variance estimation, we provide sample weights as well as two design variables: PSU and STRATA.

For samples selected from the AmeriSpeak Panel, these variables are pseudo-PSUs and pseudo strata that are defined to represent the first stage PSUs and strata associated with the NORC National Frame (Master Sample) that was used as the sampling frame for AmeriSpeak Panel recruitment sampling. The ABS and opt-in samples are not clustered, so each PSU is a single sample unit, and each STRATA is an MSA or the rest of a state outside MSAs. Using PSU and STRATA with either probability sample-only weights or combined weights will provide approximately unbiased variance estimates.

Standard variance estimation method can be used to approximate the variance of estimates based on the combined probability and nonprobability sample. NORC can provide additional information to support proper variance estimation.

The sample code provided in Figure 2 shows examples of how variable AVAR can be analyzed using corrections for weighting and sample design in R and Stata. This example uses the combined probability and nonprobability samples with the corresponding weight variable, WTSURVY. SAS users can use PROC SURVEYFREQ and PROC SURVEYMEANS to calculate the design-corrected standard errors.

Figure 2. EPOP Survey Sample Stata and R Code

STATA	
Load data	<code>use EPOP_YR1_PUF.dta, clear</code>
Set survey design	<code>svyset [pweight=WTSURVY], /// strata(STRATA) psu(PSU) singleunit(scaled)</code>
Weighted mean	<code>svy: mean AVAR</code>
Weighted percentage	<code>svy: proportion AVAR</code>
Weighted total	<code>svy: total AVAR</code>
Weighted one-way table	<code>svy: tabulate AVAR</code>
Subset mean	<code>svy, subpop (if SUBGROUP==1): mean AVAR</code>
Specifying subgroups	<code>svy: mean AVAR, over(GROUPVAR)</code>
R	
Install & load required packages	<code>install.packages(c("tidyverse", "survey")) library(haven) library(survey)</code>
Load data	<code>mydata <- read_dta("EPOP_YR1_PUF.dta")</code>
Set survey design	<code>mydesign <- svydesign(id = ~PSU, weights = ~WTSURVY, strata = ~STRATA, data = mydata, nest = TRUE)</code>
Singleton PSU correction	<code>options(survey.lonely.psu = "adjust")</code>
Weighted mean	<code>svymean(~AVAR, mydesign, na.rm = TRUE)</code>
Weighted total	<code>svytotal(~AVAR, mydesign, na.rm = TRUE)</code>
Weighted one-way table	<code>svytable(~AVAR, mydesign)</code>
Subset mean	<code>svymean(~AVAR, subset(mydesign, SUBGROUP == 1), na.rm = TRUE)</code>
Specifying subgroups	<code>svyby(~AVAR, by = ~GROUPVAR, mydesign, svymean)</code>

Statistical software may return errors when conducting variance estimation on subsamples and/or variables with a large number of observations with missing values. STRATA and PSU were created so that there was a minimum number of respondents within a STRATA/PSU cell. However, if all respondents within a cell are missing on a variable, it will be impossible to calculate the standard error. This is sometimes referred to as a “lonely PSU” or “singleton PSU.” If the dataset is subset (to current entrepreneurs, for example), this error becomes more likely to happen. In these situations, you may receive an error such as this:

STATA error handling: "missing standard error because of stratum with single sampling unit"

The best workaround to avoid this type of error is to manually combine the single-PSU stratum with a similar stratum. Alternatively, the sample code provided addresses the lonely PSU issue using automatic adjustments. In Stata, the correction is made with the `svyset` option

“singleunit(scaled)” and in R, with the command “options (survey.lonely.psu = “adjust”).” These methods of adjustment involve taking variance averages from stratum with multiple sampling units. Users should refer to their software documentation for more information on automatic adjustment methods before implementing them in their own research.

DATA FILE FORMATS

Both the RUF and PUF are available in three file formats: .csv, SAS, and STATA. Each file provides a different set of meta-data requiring different accompanying programs. As an example, the PUF package will include the data files and formatting programs shown in Table 9.

Table 9. EPOP Survey PUF Package File and Formatting Program Contents

File	Name
CSV data file	EPOP_YR2_PUF.csv
STATA data file with formatting applied	EPOP_YR2_PUF.dta
SAS data file	EPOP_YR2_PUF.sas7bdat
SAS program containing labels	EPOP_YR2_PUF_LABELS.sas
SAS program containing formats	EPOP_YR2_PUF_FORMATS.sas
SAS program to apply labels and formats	EPOP_YR2_PUF_APPLY_FORMATS_LABELS.sas

Using the .csv data file

Users of the .csv can refer to the variable names in the header column and review the data codebooks to retrieve variable format information.

Using the STATA data file

The STATA file provided is a formatted file. The file contains all labels and format information. STATA users can simply import that file and run frequencies to review variable formats and variable labels.

Using the SAS data file

Users of the SAS file may apply label and variable format information by applying the provided label and format definitions. To do this, open the provided SAS program ‘EPOP_YR2_PUF_APPLY_FORMATS_LABELS.sas’ and update the folder reference to the location where the data user has saved the EPOP data files and programs. Then run the program to apply the formatting information.

CODEBOOKS

A separate codebook is provided for the RUF and PUF. Each codebook includes an index of all variables included in the file. For each variable, a table is presented containing the variable name, variable label, original question text, and any survey skip logic. For most variables, a frequency table was the appropriate format to report answer choices. Each frequency table includes unweighted and weighted counts and percentages for each response choice and reserve code (i.e., -3-missing, -5-don't know, -7-suppressed). Continuous variables were reported as a table containing descriptive statistics: valid n, mean, median, min, max. Variables that were not continuous but contained many categories (e.g., the case identifier [R_SUID]) were reported in a frequency table where rows were grouped by valid and reserve code categories.

DATA USER SUPPORT

If you are having issues accessing the link for the PUF, specific files that were sent, or you have other questions about the EPOP Survey data or methods, please contact the EPOP research team at EPOPresearch@norc.org.

5. REPORTING, DISSEMINATION AND FUTURE FILES

ABBREVIATIONS AND CITATIONS

The full title of the survey is “The Entrepreneurship in the Population Survey” and the abbreviation is EPOP Survey. In referencing a specific year, follow these standards:

Full Project Title: **The Entrepreneurship in the Population Survey Project: 2023**

Project Abbreviation: **EPOP Survey**

Survey Cycle

Abbreviation: **EPOP:2023**

User Guide Citation: **“Entrepreneurship in the Population Survey User Guide: 2023.”**
NORC at the University of Chicago. October 16, 2022.
[EPOP.norc.org](https://www.norc.uchicago.edu/ePOP).

Data File Citations: **“Entrepreneurship in the Population (EPOP) Survey Project**
Restricted Use Data File: <year>.” NORC at the University of
Chicago. <month> <day>, <year>. [EPOP.norc.org](https://www.norc.uchicago.edu/ePOP).

“Entrepreneurship in the Population (EPOP) Survey Project Public
Use Data File: <year>.” NORC at the University of Chicago.
<month> <day>, <year>. [EPOP.norc.org](https://www.norc.uchicago.edu/ePOP).

EPOP WEBSITE: NEWS AND PUBLICATIONS

The EPOP Survey project website at [EPOP.norc.org](https://www.norc.uchicago.edu/ePOP) posts up-to-date news and information on research using the EPOP Survey data. As researchers use the data to write journal articles, research briefs, book chapters, presentations, and other products, the EPOP research team will post links to their publications on the website at their request.

Other individuals and organizations—in government, non-profit, and for-profit sectors—will also find EPOP data compelling. Ideally, they will use the data for a variety of purposes including policy action, advocacy, media releases, and proposals. Should changes to policies or programs be made based on the EPOP Survey data, the EPOP research team would appreciate being notified and will create a post about it, if permissible.

Where to find other Publications

As the EPOP Survey data gets analyzed by NORC and other researchers and mentioned by news media, a repository of EPOP related research, publications and media mentions will be available on the EPOP website: EPOP.norc.org.

Publish your analysis on the EPOP Website

The EPOP research team welcomes information on research using EPOP Survey data. Please contact EPOPresearch@norc.org if you have analyzed EPOP data and would like your research displayed on the website.

ANTICIPATED DATA RELEASE SCHEDULE

The overall timeline for implementing this project is July 1, 2021, to June 30, 2026. Table 9 shows the anticipated release of future year EPOP Survey data releases Public Use Files.

Table 9. EPOP Survey Future Data Release Schedule

Data Release	Anticipated Release Period
2022	October 2022
2023	October 2023
2024	August – September 2024
2025	August – September 2025
2026	August – September 2026

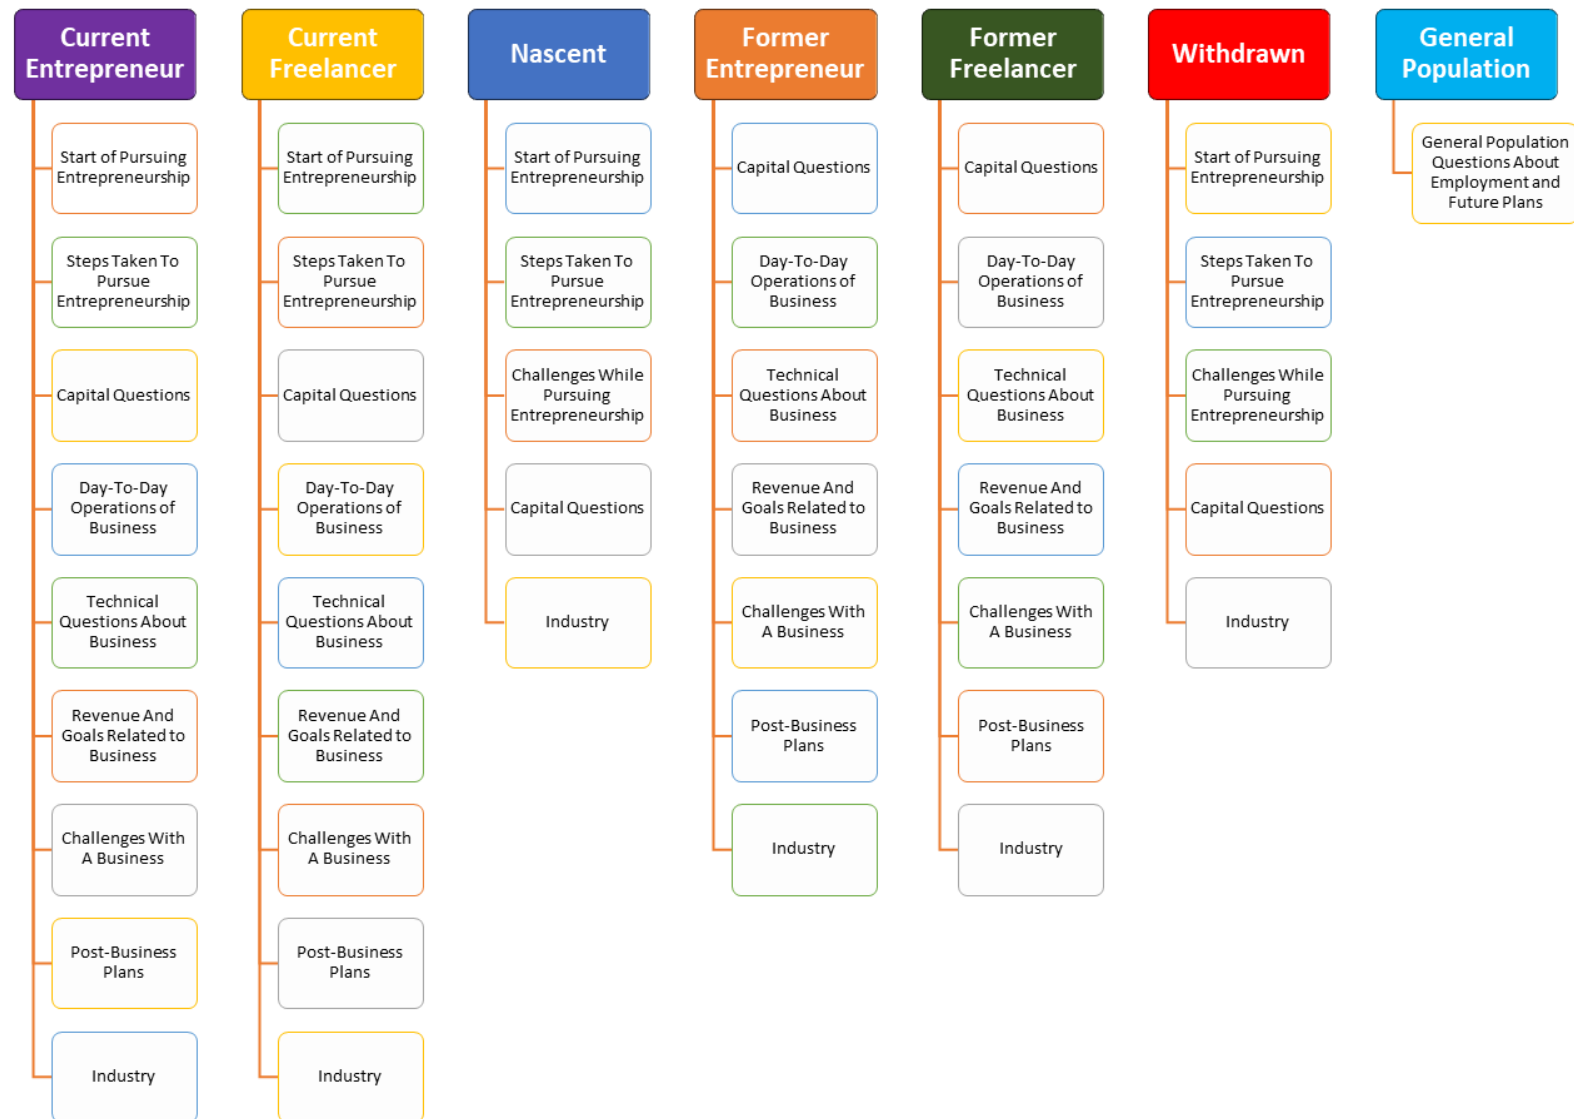

Any changes to these release periods will be posted on the EPOP website: EPOP.norc.org.

APPENDIX

APPENDIX A: ENTREPRENEURSHIP PATHWAYS AND TOPICAL AREAS IN EPOP:2023

APPENDIX B: SURVEY QUESTIONNAIRE CHANGES FROM EPOP:2022 TO EPOP:2023

#	Change	Variable	Section	Type	Category
1	Logic updated to show only to non-probability sample	DEM_STATE	Beginning Demographics	Changed Item	Logic Update
2	Added new item (DEM_COUNTY) that asks R to pick county based on dropdown within state. Only asked of non-probability panel.	DEM_COUNTY	Beginning Demographics	New Item	New Item
3	Added new item (DEM_CITY) that asks R to enter city if they don't know or skip DEM_COUNTY. Only asked of non-probability panel.	DEM_CITY	Beginning Demographics	New Item	New Item
4	Simplified DEM_ZIP to just validation that it is a proper number for ZIP code. Only asked of non-probability panel.	DEM_ZIP	Beginning Demographics	Changed Item	Logic Update
5	Added 6th response option of "None of the above".	S_JOBSTAT_5	Screener	Changed Item	Response Option Change
6	Additional inclusion of if S_JOBSTAT_5=6, respondent will see S_JOBSTAT_6	S_JOBSTAT_6	Screener	Changed Item	Logic Update
7	Created working flag to be used in subsequent questionnaire logic.	DOV_WORKING	Screener	New Item	New Item
8	Added "App-based food delivery" as example other activity for gig work items	S_GIGCHECK_1, S_GIGCHECK_2, S_GIGCHECK_3, PE_GIGREASON_1	Screener	Changed Item	Response Option Change
9	Logic updated to show if DOV_WORKING = 1	S_PAIDJOB_1	Screener	Changed Item	Logic Update
10	Display logic updated to be based on S_JOB_1 and S_JOB_2 responses instead of category flags.	S_FORMBIZ_1	Screener	Changed Item	Logic Update
11	Included definition of business owner and freelancer provided on S_JOB_1 for all former business owner and former freelancer items to keep definitions consistent	S_FORMBIZ_1, S_FORMBIZ_2, S_FORMBIZ_STAT_1, S_FORMBIZ_STAT_2, S_FORMBIZ_STAT_3, S_FORMFREE_1, S_FORMFREE_STAT_1, S_FORMFREE_STAT_2, S_FORMFREE_STAT_3	Screener	Changed Item	Question Wording Update

#	Change	Variable	Section	Type	Category
12	Display logic updated to be based on S_JOB_1 and S_JOB_2 responses instead of category flags.	S_FORMBIZ_2	Screeners	Changed Item	Logic Update
13	Added new item (S_ADDBIZ_1) that asks current business owners if they own another business	S_ADDBIZ_1	Screeners	New Item	New Item
14	Added new item (S_ADDBIZ_2) that asks how many businesses current business owners own	S_ADDBIZ_2	Screeners	New Item	New Item
15	Added new item (S_ADDBIZ_3) that asks if current business owners ever had a business that they closed, sold, or left	S_ADDBIZ_3	Screeners	New Item	New Item
16	Updated S_FORMBIZ_STAT_2 logic to include current business owners who also used to own another business	S_FORMBIZ_STAT_2	Screeners	Changed Item	Logic Update
17	Display logic updated to be based on S_JOB_1 and S_JOB_2 responses instead of category flags.	S_FORMFREE_1	Screeners	Changed Item	Logic Update
18	Added new item (S_ADDFREE_1) that asks current freelancers if they do other freelance work	S_ADDFREE_1	Screeners	New Item	New Item
19	Added new item (S_ADDFREE_2) that asks current freelancers how many freelance gigs they have	S_ADDFREE_2	Screeners	New Item	New Item
20	Added new item (S_ADDFREE_3) that asks current freelancers if they ever ended a freelance gig in the past	S_ADDFREE_3	Screeners	New Item	New Item
21	Added S_FORMFREE_STAT_2 to ask respondents to indicate what year they stopped doing freelance work	S_FORMFREE_STAT_2	Screeners	New Item	New Item
22	Added S_FORMFREE_STAT_3 to ask how long ago respondents stopped doing previous freelance work	S_FORMFREE_STAT_3	Screeners	New Item	New Item
23	Updated question to include professional practice or farm	S_NASCENT_1	Screeners	Changed Item	Question Wording Update
24	Updated DOV_CUR_ENTR, DOV_CUR_FREE, DOV_FORM_ENTR, DOV_FORM_FREE, and DOV_NASCENT flag logic to only be set once	DOV_CUR_ENTR, DOV_CUR_FREE, DOV_FORM_ENTR, DOV_FORM_FREE, DOV_NASCENT	Screeners	Changed Item	Logic Update

#	Change	Variable	Section	Type	Category
25	Updated S_WITHDRAW_1 logic to be asked of everyone with specific language for each entrepreneurship flag	S_WITHDRAW_1	Screeners	Changed Item	Logic Update
26	Updated logic to only display to withdrawn entrepreneurs and no other flags; included additional wording to include professional practice, farm, consultant, freelancer, or independent contractor	S_INTEREST_2	Screeners	Changed Item	Logic Update
27	Updated logic to only show if DOV_CUR_FREE=1	S_GIGPLATFORM_1	Screeners	Changed Item	Logic Update
28	Updated logic to show if IF S_GIGPLATFORM_1 = 1 OR S_GIGCHECK_1 = 1 OR S_GIGCHECK_2 = 1 OR S_GIGCHECK_3 = 1	S_GIGPLATFORM_2	Screeners	Changed Item	Logic Update
29	Updated DOV_GROUP logic to remove extra criteria for nascent and former entrepreneurs, changing entrepreneur to business owner	DOV_GROUP	Screeners	Changed Item	Logic Update
30	Updated DOV_ACTIVITY logic to simplify activity for nascent and withdrawn entrepreneurs	DOV_ACTIVITY	Screeners	Changed Item	Logic Update
31	Updated DOV_FORM_ENTR logic to include current business owners who sold/left/ended a business in the past	DOV_CUR_ENTR	Screeners	Changed Item	Logic Update
32	Updated DOV_FORM_FREE logic to include current freelancers who sold/left/ended a freelance gig in the past	DOV_CUR_FREE	Screeners	Changed Item	Logic Update
33	Added new item (PE_REASONS_2) that asks respondents to select most important reason from PE_REASONS_1; response options shown based on selection of PE_REASONS_1	PE_REASONS_2	Pursuing Entrepreneurship	New Item	New Item
34	Added new item (PE_REASONS_3) that asks respondents to select second most important reason from PE_REASONS_1 if more than two reasons were selected, response options shown based on selection of PE_REASONS_1	PE_REASONS_3	Pursuing Entrepreneurship	New Item	New Item
35	Added 3 new entrepreneurship experiences items	ENTR_EXPERIENCE_1, ENTR_EXPERIENCE_2, ENTR_EXPERIENCE_3	Pursuing Entrepreneurship	New Item	New Item
36	Changed PE_STEPS_7 from open-ended response to yes/no response.	PE_STEPS_7	Pursuing Entrepreneurship	Changed Item	Question Wording Update
37	Added PE_STEPS_8 that asks for "other" responses	PE_STEPS_8	Pursuing Entrepreneurship	New Item	New Item

#	Change	Variable	Section	Type	Category
38	Added new item (PE_STEPS_REASONS) that asks why respondents did not take any unselected steps from PE_STEPS_1 through PE_STEPS_6.	PE_STEPS_REASONS	Pursuing Entrepreneurship	New Item	New Item
39	Added two response options to PE_CHALLENGE_1.	PE_CHALLENGE_1	Pursuing Entrepreneurship	Changed Item	Response Option Change
40	Changed PE_CHALLENGE_6 from open-ended response to yes/no response.	PE_CHALLENGE_6	Pursuing Entrepreneurship	Changed Item	Question Wording Update
41	Added PE_CHALLENGE_7 that asks for "other" responses.	PE_CHALLENGE_7	Pursuing Entrepreneurship	New Item	New Item
42	Removed none of the above option in PE_CAPITAL_INSTITUTION_1	PE_CAPITAL_INSTITUTION_1	Pursuing Entrepreneurship	Changed Item	Response Option Change
43	Updated PE_CAPITAL items to ask for amounts via a worksheet where total is calculated on the fly	All PE_CAPITAL items	Pursuing Entrepreneurship	Changed Item	Capital Series Refinement
44	Addition of PE_CAPITAL_CONF that asks about correct amount of capital received	PE_CAPITAL_CONF	Pursuing Entrepreneurship	Changed Item	Capital Series Refinement
45	Added additional logic to show if PE_CAPITAL_1 is selected and PE_CAPITAL_WS does not equal 0	PE_CAPITAL_2	Pursuing Entrepreneurship	Changed Item	Capital Series Refinement
46	Added additional logic to show if PE_CAPITAL_1 is not selected or PE_CAPITAL_WS equals 0	PE_CAPITAL_3	Pursuing Entrepreneurship	Changed Item	Capital Series Refinement
47	Added new item (PE_CAPITAL_4) that asks for reasons Rs were given if they were declined funding.	PE_CAPITAL_4	Pursuing Entrepreneurship	New Item	Capital Series Refinement
48	Added new item that asks for reasons why Rs did not request grant funding.	PE_CAPITAL_5	Pursuing Entrepreneurship	New Item	Capital Series Refinement
49	Added new item that asks for reasons why Rs did not request bank/financial institution funding.	PE_CAPITAL_6	Pursuing Entrepreneurship	New Item	Capital Series Refinement
50	Added new item that asks for reasons by Rs did not request other types of funding.	PE_CAPITAL_7	Pursuing Entrepreneurship	New Item	Capital Series Refinement
51	Added PE_STOPREASON_2 asking respondents to select their primary reason from PE_STOPREASON_1 for stopping working for themselves.	PE_STOPREASON_2	Pursuing Entrepreneurship	New Item	New Item
52	Added PE_STOPREASON_3 asking respondents to select their secondary reason from PE_STOPREASON_1 if more than two were selected	PE_STOPREASON_3	Pursuing Entrepreneurship	New Item	New Item

#	Change	Variable	Section	Type	Category
53	Adjusted wording for question to include "work" and "or use"	BO_ADDFINANCE_1	Business Operations	Changed Item	Capital Series Refinement
54	Adjusted wording to clarify that questions are in reference to funding received after starting work, not including startup funding	DISPLAY_ADDFINANCE	Business Operations	Changed Item	Capital Series Refinement
55	Adjusted text of BO_ADDFINANCE_2 to say "Did you use any of the following..."	BO_ADDFINANCE_2	Business Operations	Changed Item	Capital Series Refinement
56	Removed "None of the above" option on BO_ADDFINANCE_INSTITUTION_1	BO_ADDFINANCE_INSTITUTION_1	Business Operations	Changed Item	Capital Series Refinement
57	Adjusted text of BO_GRANT_TYPE_1 to say "received" instead of "requested"	BO_GRANT_TYPE_1	Business Operations	Changed Item	Capital Series Refinement
58	Updated BO_ADDFINANCE items to ask for amounts via a worksheet where total is calculated on the fly	All BO_ADDFINANCE items	Business Operations	Changed Item	Capital Series Refinement
59	Addition of BO_ADDFINANCE_CONF that asks about correct amount of capital received	BO_ADDFINANCE_CONF	Business Operations	New Item	Capital Series Refinement
60	Adjusted wording to clarify what respondent had used for additional financing after start-up; Added additional logic to show if BO_ADDFINANCE_2 is selected and BO_ADDFINANCE_WS does not equal 0	BO_ADDFINANCE_3	Business Operations	Changed Item	Capital Series Refinement
61	Included additional wording indicating whether respondent applied for or requested funding but did not receive any; Added additional logic to show if BO_ADDFINANCE_2 is not selected or BO_ADDFINANCE_WS equals 0	BO_ADDFINANCE_4	Business Operations	Changed Item	Capital Series Refinement
62	Added new item (BO_ADDFINANCE_5) that asks for reasons Rs were given if they were declined funding.	BO_ADDFINANCE_5	Business Operations	New Item	Capital Series Refinement
63	Added new item that asks for reasons why Rs did not request grant funding.	BO_ADDFINANCE_6	Business Operations	New Item	Capital Series Refinement
64	Added new item that asks for reasons why Rs did not request bank/financial institution funding.	BO_ADDFINANCE_7	Business Operations	New Item	Capital Series Refinement
65	Added new item that asks for reasons by Rs did not request other types of funding.	BO_ADDFINANCE_8	Business Operations	New Item	Capital Series Refinement
66	Added new item that asks about what percentage of business owner's employees have an hourly wage above the "living wage" of their state	BO_EMPWAGES	Business Operations	New Item	New Item

#	Change	Variable	Section	Type	Category
67	Added 2 new remote work items tailored to sole proprietors and business owners with employees.	REMOTE_2, REMOTE_3	Business Operations	New Item	New Item
68	Added new item measuring amount of cash reserves for business owners	BO_CASH	Business Operations	New Item	New Item
69	Added new item measuring types of business interruptions in the past year.	BUSINESS_INTERRUPTIONS_1	Business Operations	New Item	New Item
70	Added 2 items measuring the changes in prices of goods and services and cost of salaries for employees	BUSINESS_COSTS_1, BUSINESS_COSTS_2	Business Operations	New Item	New Item
71	Removed "supply chain issues" as response option	BO_CHALLENGE_2	Business Operations	Changed Item	Response Option Change
72	Added new response option of "Identifying business opportunities in the market"	BO_CHALLENGE_3	Business Operations	Changed Item	Response Option Change
73	Added two new response options to BO_CHALLENGE_4	BO_CHALLENGE_4	Business Operations	Changed Item	Response Option Change
74	Added a new response option to BO_CHALLENGE_5	BO_CHALLENGE_5	Business Operations	Changed Item	Response Option Change
75	Changed BO_CHALLENGE_6 from open-ended response to yes/no response.	BO_CHALLENGE_6	Business Operations	Changed Item	Question Wording Update
76	Added BO_CHALLENGE_7 that asks for "other" responses	BO_CHALLENGE_7	Business Operations	New Item	New Item
77	Added new item asking how respondents addressed the BO_CHALLENGE items they selected.	BO_CHALLENGE_ADDRESS	Business Operations	New Item	New Item
78	Added BO_REASONS_1 asking respondents to select their primary challenge from BO_CHALLENGE_END for stopping working for themselves.	BO_REASONS_1	Business Operations	New Item	New Item
79	Added BO_REASONS_2 asking respondents to select their secondary challenge from BO_CHALLENGE_END for stopping working for themselves if they selected more than two.	BO_REASONS_2	Business Operations	New Item	New Item
80	Add two new response options to BO_EXITSTRAT_1	BO_EXITSTRAT_1	Business Operations	Changed Item	Response Option Change
81	Added response option about low credit score to GP_CONSIDER_1	GP_CONSIDER_1	Non-Entrepreneurial	Changed Item	Response Option Change

#	Change	Variable	Section	Type	Category
82	Added GP_CONSIDER_2 asking respondents to select their primary reason from GP_CONSIDER_1 for not pursuing entrepreneurship.	GP_CONSIDER_2	Non-Entrepreneurial	New Item	New Item
83	Added GP_CONSIDER_3 asking respondents to select their secondary reason from GP_CONSIDER_1 for not pursuing entrepreneurship if they selected more than two.	GP_CONSIDER_3	Non-Entrepreneurial	New Item	New Item
84	Added new item asking non-business owners their perception of entrepreneurship biggest challenges	ENTR_CHALLENGES_1	Non-Entrepreneurial	New Item	New Item
85	Added new item that asks likelihood of exploring new business idea if they had one.	GP_CONSIDER_4	Non-Entrepreneurial	New Item	New Item
86	Added new item that asks what supports they would need to help them explore a new business idea if they had one.	GP_CONSIDER_5	Non-Entrepreneurial	New Item	New Item
87	Added new item that asks what the biggest challenges would be if they had a new business idea.	GP_CONSIDER_6	Non-Entrepreneurial	New Item	New Item
88	Updated GP_EMPLOYERLENGTH_1 with DOV_WORKING logic	GP_EMPLOYEELENGTH_1	Non-Entrepreneurial	Changed Item	Logic Update
89	Updated GP_NUMEMPSTART_1 with DOV_WORKING logic	GP_NUMEMPSTART_1	Non-Entrepreneurial	Changed Item	Logic Update
90	Updated GP_WEEKSWK_1 with DOV_WORKING logic	GP_WEEKSWK_1	Non-Entrepreneurial	Changed Item	Logic Update
91	Updated GP_HOURSWK_1 with DOV_WORKING logic	GP_HOURSWK_1	Non-Entrepreneurial	Changed Item	Logic Update
92	Updated GP_EMPBENEFIT_1 with DOV_WORKING logic	GP_EMPBENEFIT_1	Non-Entrepreneurial	Changed Item	Logic Update
93	Added new item that asks if you are allowed or required to work remotely	REMOTE_1	Non-Entrepreneurial	New Item	New Item
94	Updated GP_NEWJOB_1 with DOV_WORKING logic	GP_NEWJOB_1	Non-Entrepreneurial	Changed Item	Logic Update
95	Updated GP_NEWJOB_2 with DOV_WORKING logic	GP_NEWJOB_2	Non-Entrepreneurial	Changed Item	Logic Update
96	Asking HH income of all samples	DEM_HHINC	End Demographics	Changed Item	Logic Update
97	Removed DEM_COMM_RATE		End Demographics	Removed Item	Removed Item

#	Change	Variable	Section	Type	Category
98	Removed PE_COVIDCONCERN		End Demographics	Removed Item	Removed Item
99	New wording for DEM_HOUSENUM items to count of number of people in household.	DEM_HOUSENUM_1, DEM_HOUSENUM_2	End Demographics	Changed Item	Question Wording Update
100	Updated DEM_HOUSEHOLD logic to only allow options that fit with the number of people in the household	DEM_HOUSEHOLD	End Demographics	Changed Item	Logic Update
101	Updated DEM_HOUSECHILD to make entering ages in categories easier on respondents as well as only allow options that fit with previous answers for DEM_HOUSENUM and DEM_HOUSEHOLD	DEM_HOUSECHILD	End Demographics	Changed Item	Question Wording Update
102	Added new item that asks to confirm total number of children/grandchildren under the age of 18	DEM_HOUSECHILD_CONF	End Demographics	New Item	New Item

APPENDIX C: CROSS ROUND VARIABLE CHANGES TO REFERENCE WHEN COMPARING OR MERGING DATA FROM EPOP:2022 TO EPOP:2023

Table C-1. EPOP Round Specific Variable Names
