[HOVER TEXT ON "generative AI": "Generative AI" is a category of artificial intelligence (AI) that empowers machines to generate new content rather than simply analyze or manipulate existing data. By using models trained on vast amounts of data, generative AI can generate content – such as text, photos, audio, or video – that is sometimes indistinguishable from content developed directly by humans. Large language models (LLMs), which power chatbots and other text-based AI tools, represent one common type of generative AI (Federal Trade Commission, 2023).] [SHOW IF DOV_GROUP = 1,2]

Description: Is your business planning to use generative AI within the next 12 months? [HOVER TEXT ON "generative AI": "Generative AI" is a category of artificial intelligence (AI) that empowers machines to generate new content rather than simply analyze or manipulate existing data. By using models trained on vast amounts of data, generative AI can generate content – such as text, photos, audio, or video – that is sometimes indistinguishable from content developed directly by humans. Large language models (LLMs), which power chatbots and other text-based AI tools, represent one common type of generative AI (Federal Trade Commission, 2023).] [SHOW IF DOV_MICROBIZ = 1 AND TECH_1 = 2 OR -3]
